

SAHARA HOSPITAL TENT

Our Sahara Hospital Tent is a weather-resistant, rapidly deployable field hospital designed for emergency relief, disaster zones, and remote missions.

Made with high-durability fabric and modular sections, it offers scalable space for triage, patient care, and surgery under extreme conditions.

TECHNICAL SPECIFICATIONS

Standard Features

Inflatable field hospital tent (air-supported structure)	Compressor
UV-resistant, fire-retardant tent fabric	Spine board
Heat-insulated floor and window covers	Foldable patient beds
External conduit design to prevent water ingress	Camp beds
Special electric and cable connection nodes	Stretchers
Ground fixation connectors at each tent corner	Emergency bag
Carrying bag for transport	Basic medical bag
Repair and maintenance set	Transport case
Patch kit for external surface damage	UV sterilization lamp (in operating room)
Implicit internal electric system	Stainless steel storage system (in OR)
LED internal lighting system (hanging type)	Mobile field tent layout includes:
External telescopic lighting system	1 surgeon room
Technical room with:	1 room with 4 beds
Two 100L water tanks (clean and dirty)	Sterilization room
Air pressure tank for water distribution	Operating room
Setup time under 10 minutes	Gas storage area
No internal metal supports	Intensive care configuration possible with:
Modular tent structure (connectable units)	• Monitor
Wastewater pump	• Oxygen system
Floor grid system	• Life support unit
