

TIMAK SOLAR PILE DRIVER MACHINE

Solar Pile Driver is a machine used to drive poles into the ground to lay foundation for the solar panel. The vibrating hammer on the vertically movable guides is driven by hydraulic motors powered by the diesel engine on the machine. Vertical vibrations are transmitted to the pile and driving into ground is performed, while horizontal vibrations are damped to ensure stable operation of the machine.

Solar Pile Driver Standard Equipment

Engine & Power

Engine Type: 34 kW Diesel Engine, sound-insulated

Impact Energy: 1200 Joules

Hammer Weight: 400 kg

Strikes per Minute: 350-700 blows/min

Noise Level: 127 dB

Fuel Tank Capacity: 80 L

Hydraulic System

Hydraulic Operation: Manual lever-controlled system

Hydraulic Oil Tank Capacity: 80 L

Working Pressure: 140 bar (standard), up to 250 bar (maximum)

Hydraulic Flow Rate: 50 L/min

Gear Pump: 44 cc, max. 250 bar

Control Valve: Monobloc hydraulic valve system, one cylinder per valve

Overcenter Valve: Adjustable twin load-holding valve, 80 L/min flow

Cylinder Sleeves: ST-52 honed steel pipes with 25µ chrome-coated shafts

Hydraulic Hoses: Minimum ½" R2 specification

Cooling System: Automatic radiator activation at 50°C oil

Hammer System

Hammer Stroke Height: 3800-6000 mm

Vertical Alignment: Maintains vertical hammer position during operation

Boom Control: Telescopic hydraulic boom with lift, lower, and center control

Build & Materials

Steel Thickness: Minimum 8 mm on structural components

Track Bearings: Special brass material

Fasteners & Unions: Fully galvanized for corrosion resistance

Optional Equipment

GPS Tracking System

Remote Control Unit

Automatic Column Leveling System

Hydraulic Auger Attachment

Lighting Kit (LED Work Lights)

Camera System with Monitor

Tool Storage Compartment

Additional Fuel Tank

Safety Alarm & Beacon Light

DURABLE. EFFICIENT.

The increase in the demand for solar energy in recent years and the rapid growth in the sector have created the need for speed and precision in the installation of solar energy systems. TIMAK has developed solar pile drivers to meet this need in the sector. It is specially designed to be operated in large solar panel fields as easy to use, fast, high precision.
